

PRESS RELEASE – PRODUCT LAUNCH

FOR IMMEDIATE RELEASE

Mobility Research Inc.
444 West Geneva Street
Tempe, AZ 85282

1-800-332-9255

Las Vegas, NV (November 4, 2011) Mobility Research Inc. is pleased to announce the product launch of the HugN-Go lift, the newest addition to Mobility Devices by LiteGait[®], at the Association of Rehabilitation Nurses 37th Annual Educational Conference. HugN-Go is a supportive, lightweight device that lifts patients from a bed or wheelchair, and safely supports them during ambulation. It couples to the patient for support, moves along easily and allows enough space to promote a normal size step. HugN-Go allows individuals up to 350 lbs with a wide range of impairments to get up and to walk over ground safely.

The HugN-Go continues Mobility Research's almost 20 year history of providing innovative rehabilitation therapy products to rehabilitation clinicians. For additional information, please visit <http://litegait.com/md.html>.

About Mobility Research: As a pioneer in the Partial Weight Bearing Gait therapy solutions, Mobility Research is the manufacturer of the LiteGait[®] family of products, used in treating spinal cord injury, amputation, stroke, chronic pain, head injury, orthopedic problems, cerebral palsy, balance issues, multiple sclerosis, and arthritis.

We are a company of rehabilitation professionals dedicated to the transfer of the latest technology and research knowledge to the rehabilitation arena. Our team of clinicians, researchers, educators, and engineers provide products, education, and rehabilitation solutions for pediatric and adult populations with motor control related disabilities.
